

a) RFS

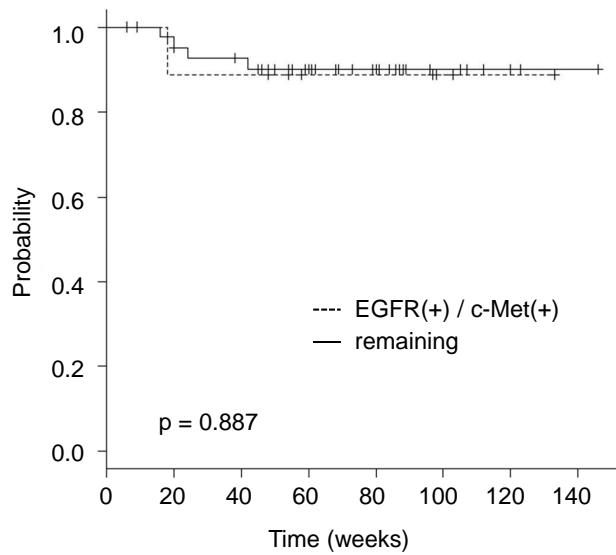

b) OS

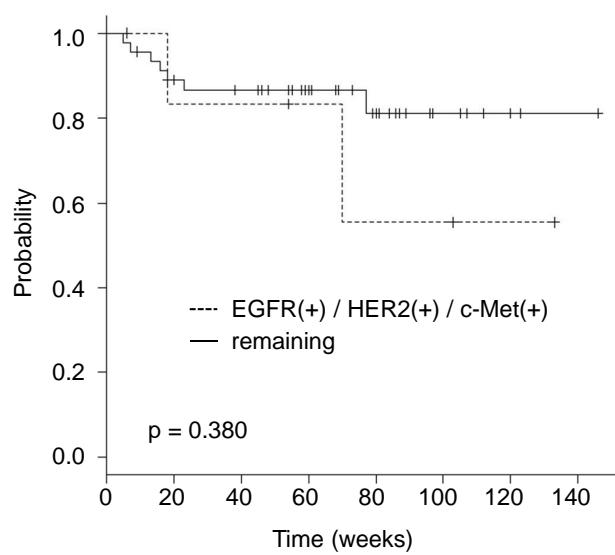

c) RFS

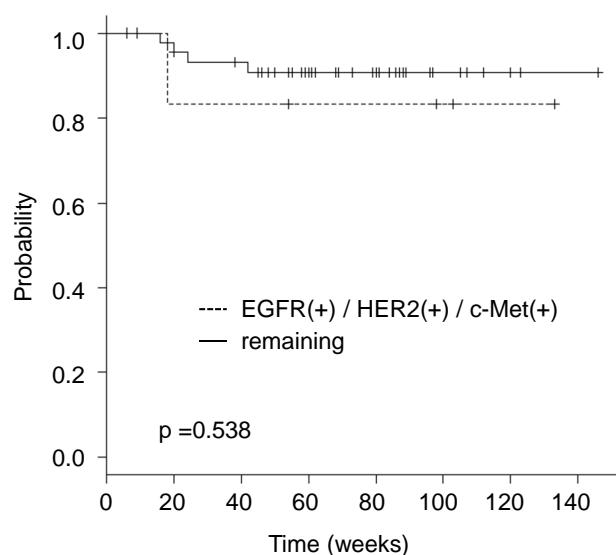

d) OS

e) RFS

f) OS

S2 Fig. Kaplan-Meier estimates of the recurrence-free survival (RFS) and overall survival (OS) of the patients with cervical adenocarcinoma according to the combined expression of RTKs. The patients were classified into two groups, those with high expression of multiple RTKs (dashed lines) and the remaining patients (solid lines).
(a)(b) HER2 and c-Met, (c)(d) EGFR and c-Met, and (e)(f) EGFR, HER2 and c-Met.
